Online Data Table 14
Comparison of population and death counts in tax data and NCHS data

Description

This table reports US population and death counts by age, year, and sex from various sources. Counts labelled "dm1" are derived from the Social Security Administration Data Master 1 file. Counts labelled "irs" are derived from tax data. Counts labelled "cdc" are derived from NCHS life tables.

Codebook

Raw Variable Name	Variable Category	Variable Description
gnd		Gender
year		Year
age		Age
dm1_pop	SSA DM-1 Counts	Population
dm1_dead		Deaths
irs_pop	IRS Counts, Full Sample	Population
irs_dead		Deaths
irs_posinc_pop	IRS Counts, Positive Income Sample	Population
irs_posinc_dead		Deaths
irs_zeroinc_pop	IRS Counts, Zero Income Sample	Population
irs_zeroinc_dead		Deaths
cdc_dead	CDC Counts	Population
cdc_pop		Deaths
